EXPOSURE:

Academic Projects:

Title: Add Agency System

Platform Used: .NET, SQL

Description: Our project Add Agency System is an application based on client-server architecture which provides a friendliness environment for ADD Agency solving various kinds of management issues in the market. For front end we used .net framework and in the backend, we used SQL as database. In our application we send a request from client side and the backend server satisfies the request. It is divided into 5 modules where we have Login module which provides Admin and user logins, Add/Remove Employee, Previous Employee, Settings and Price Contract.
